EDUCATION

ICFAI Foundation for Higher Education

Hyderabad

Bachelor of Arts in Economics

Aug 2023 – Present

Relevant Coursework: Microeconomics, Macroeconomics, Econometrics, Financial Markets, Public Finance, Mathematical Analysis for Economists

PROFESSIONAL SUMMARY

Economics undergraduate with hands-on experience in financial data analysis, equity research, and capital markets. Proficient in SQL, Excel, and Power BI with demonstrated project experience in equity screening, index performance analysis, and macroeconomic research. Strong domain understanding of Indian financial markets, mutual fund ecosystems, and investor servicing concepts. Seeking a fresher role in financial services operations or analytics where I can contribute analytical rigor and capital markets knowledge to support investor and issuer servicing functions.

EXPERIENCE

EDIGITECH

Remote

Market Research Data Analyst Intern

June 2025 - July 2025

- * Conducted secondary market research on Indian technology firms operating in AI/ML, data engineering, and indigenous security solutions.
- * Collected, cleaned and standardised datasets from company websites, industry reports and news sources using Microsoft Excel (VLOOKUP, INDEX-MATCH, conditional formatting)
- * Performed SWOT analysis and competitor benchmarking to assess growth potential and strategic fit
- * Prepared 5+ stakeholder reports and data-backed recommendations to support internal decision-making

PROJECTS

Sensex & Nifty Market Analysis |

- * Conducted comparative time-series analysis of India's benchmark equity indices to study price trends, returns, and volatility
- * Analyzed historical market data using Excel and Power BI to visualize performance patterns and risk dynamics
- * Interpreted risk-return patterns to compare relative stability and performance between Sensex and Nifty indices
- * Computed daily returns, cumulative returns, and rolling volatility to assess short-term risk dynamics and market shocks

Quant Stock Screener | *SQL Based*

- * Built a rule based equity screening system using SQL to filter stocks based on valuation, momentum, and liquidity criteria
- * Designed queries to identify investment candidates using structured financial data
- * Demonstrated the use of SQL for financial data extraction, filtering, and analysis in an equity research context

Inflation & Cost of Living Analysis |

- * Analyzed Consumer Price Index (CPI) trends to study changes in inflation and purchasing power over time
- * Examined the impact of inflation on household cost of living using macroeconomic indicators
- * Linked empirical findings with economic theory to evaluate inflation's implications for living standards
